GENERAL NOTES:

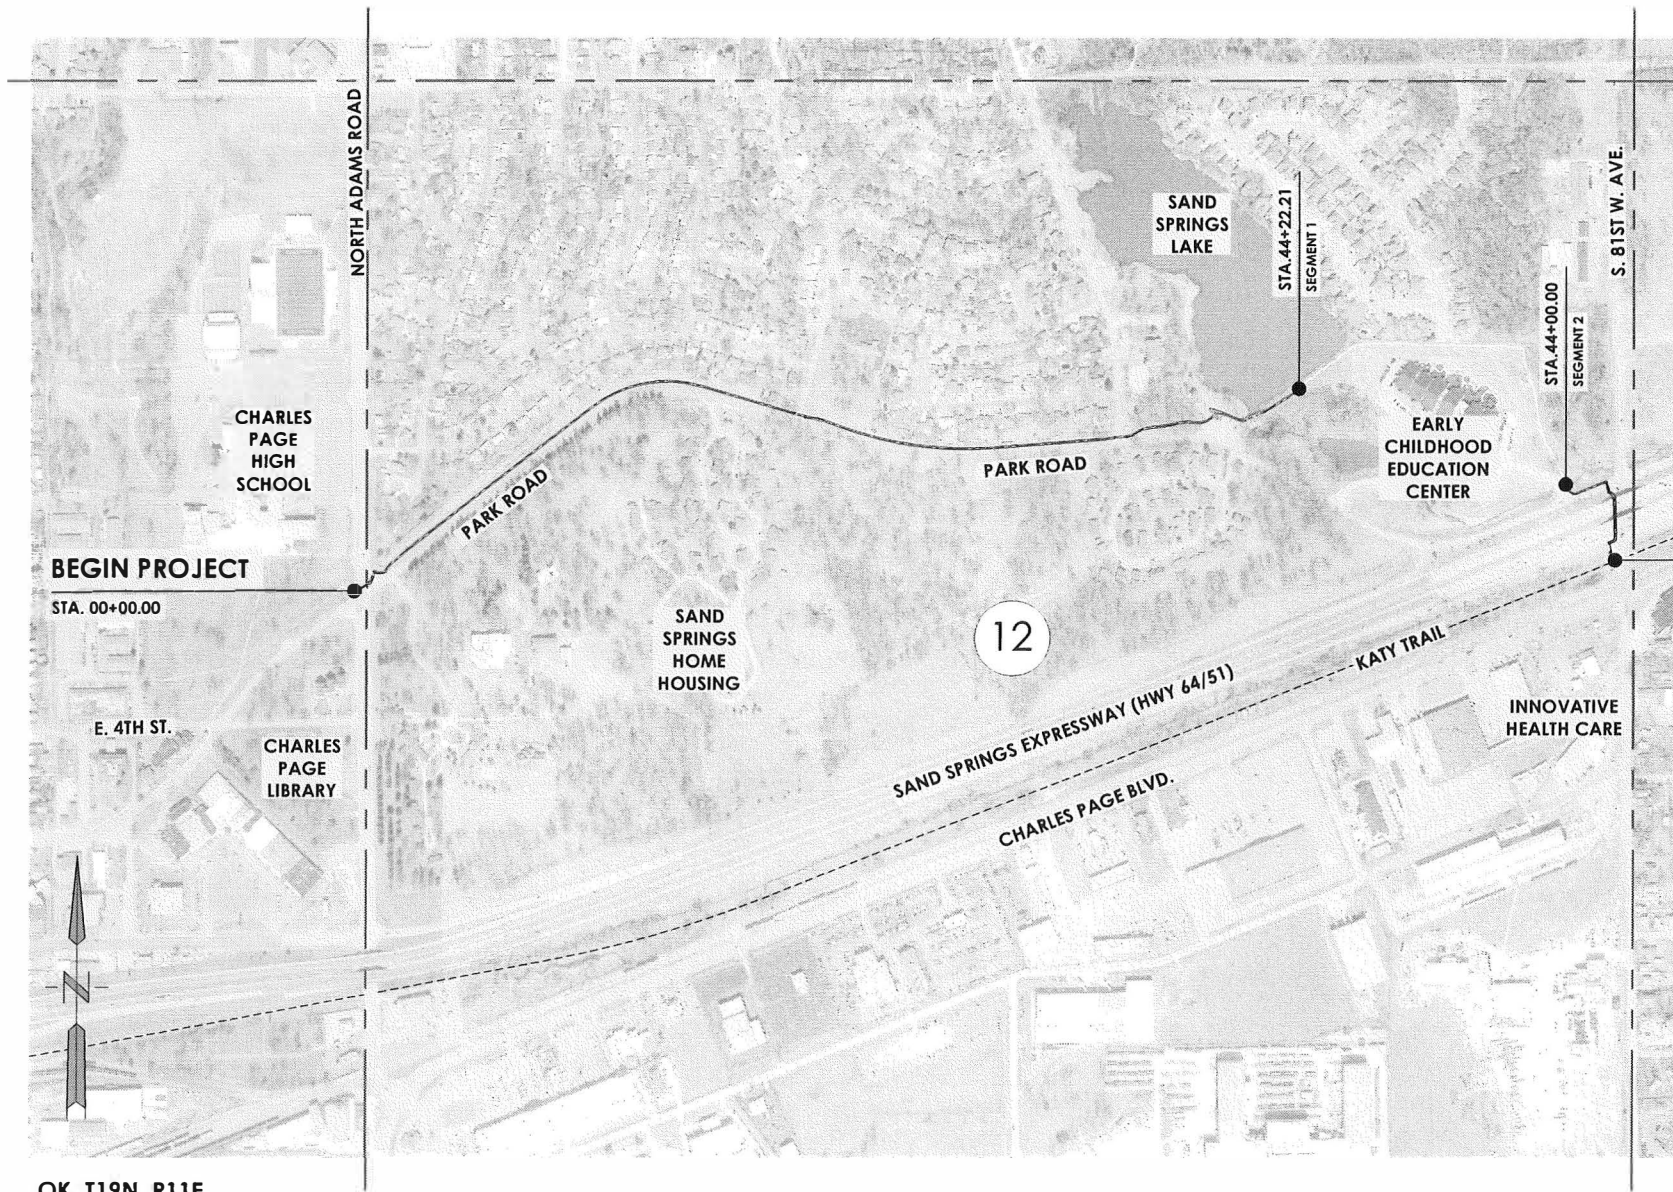

This Design is specifically prepared for use at the location shown. Use in any other manner exceeds the intended purpose of these drawings and any accompanying specifications.

All construction shall be in strict accordance with current City of Sand Springs Codes, Standards and Specifications. Back fill in buried conduit trenches shall be compacted to 95% proctor density.

Contractor shall be responsible for damage to near by structures, shrubbery, landscaping and all other items located within the work area. All damage outside the work area shall be repaired at contractor expense.

Contractors will coordinate with identified maintenance operations personnel for application and removal of utilities.

2009 Oklahoma Standard Specifications for Highway Construction Govern. Approved by the U.S. Department of Transportation, Federal Highway Administration, January 4, 2010. Supplemental Specifications to the 2009 Standard Specifications Govern over the Standard Specifications.
