WATERLINE LOWERING

PROJECT NO. WC-0923

Construction activities that result in land disturbance of equal to or greater than one (1) acre, or less than one (1) acre if they are part of a larger common plan of development or sale that totals at least one (1) acre must also obtain a permit from ODEQ (form 605-002A) for Storm Water Discharge from Construction Activities.

This means that land disturbing of one (1) acre or more must permit with ODEQ and the City of Oklahoma City, Storm Water Quality.

The USGS 7.5 Minutes Quadrangle sheets indicate that "Waters of the United States" and "Wetlands" exist within this project area. The issue of "Waters of the United States" and "Wetlands" falls under the Corps of Engineers (COE) Tulsa District Regulatory Division, but the City is obligated to insure that all necessary State and Federal Permits have been obtained, pursuant to 44 CFR 60.3. Therefore, the applicant is required to submit documentation from the COE showing COE approval for the proposed work.
