FOREWORD

**BUDGETARY
PROJECTIONS**

Budgetary Projections

ASSET PRESERVATION PLAN - SFY 2018 through SFY 2021

The budgetary projections utilized for the basis of the fiscally responsible and financially balanced Asset Preservation Plan were established through a systematic evaluation of the Department's anticipated State and Federal revenues and expenditures. Projections were performed for State Fiscal Years 2018 - 2021 with the State Fiscal Year defined as beginning July 1st and ending on June 30th. The budgetary projections only address funding that has been historically and/or categorically committed to State asset preservation.

For the purposes of the initial projections, an estimated budgetary baseline amount of \$120 million was utilized as the benchmark for SFY 2018. This baseline amount provides \$75 million for roadway preservation, \$40 million for bridge preservation and engineering, and \$5 million for accessibility projects statewide.

A formula that includes consideration for conditions and that is influenced by the lane miles in each Field Division is applied to the roadway asset preservation baseline amount to insure an equitable geographic distribution of each Fiscal Year projection. Likewise, a formula that is focused on the square footage of bridge deck in each Field Division is applied to the bridge preservation baseline amount to achieve a similar distribution of the available bridge asset preservation funds. Lastly, a formula considering common demographic, physical and historical criteria, and yields a Divisional percentage that renders an equitable distribution of funds set aside for accessibility projects.

**BALANCING
PROCESS**

Balancing Process

The development of Asset Preservation Plan begins with our Field Division Engineers and is guided by their knowledge of the transportation needs and priorities in their respective Divisions. They and their staff work to maintain an understanding of the condition of the roads and bridges in their areas of responsibility.

Their daily experiences and knowledge of the transportation assets is then coupled with the careful consideration of the improvements anticipated to be delivered through the Eight Year Construction Work Plan (CWP). It is important to maintain a clear perspective of the project development schedule for the improvements encompassed by the CWP. The timing of preservation activities is paramount in order to avoid potential project conflicts and to maintain the transportation system in a serviceable and manageable condition until any planned larger scope improvements can be achieved.

The Asset Preservation Plan is a function of each Field Division's condition assessments of the highway network, the associated critical needs and the work to be accomplished in the CWP along with the anticipated preservation budgets. Annually, the Field Division Engineers review and validate the scheduled Asset Preservation Plan projects and target their needed preservation activities in accordance with the projected funding availability. The Asset Preservation Plan is crafted with foremost consideration for maintaining the integrity of the Field Division Engineer's transportation system management strategy and project priorities. In addition, the balancing process seeks to insure that each Field Division is allocated available funding in accordance with the aggregate budget projections.

ADDITIONAL CONSIDERATIONS

System preservation can be dramatically influenced by the unpredictable effects of weather, deterioration and ever changing traffic patterns. Therefore, asset preservation activities are somewhat more reactionary in nature than the calculated improvements encompassed in the Construction Work Plan. Some re-prioritization of the preservation activities depicted herein is acceptable and expected.

The Asset Management Plan is balanced within these guidelines and has been determined to be an equitable representation to the satisfaction of the Department and the Transportation Commission.

**SUMMARY
REPORT**

ASSET PRESERVATION PLAN SUMMARY REPORT

SFY	Available Funds	Division 1	Division 2	Division 3	Division 4	Division 5	Division 6	Division 7	Division 8	SFY Totals
