SECTION IV	SUMMARY REPORT
SECTION V	ASSET PRESERVATION PLAN Sorted by State Fiscal Year and by County

FOREWORD

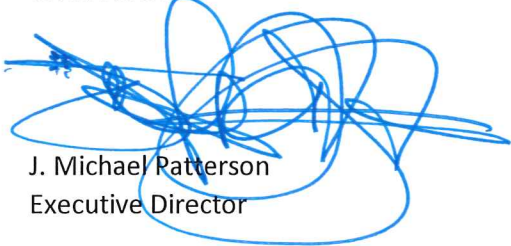

The Oklahoma Department of Transportation has compiled the 2019-2022 Asset Preservation Plan. This Plan includes highway system asset preservation activities as selected by ODOT's eight field division engineers. These activities include bridge rehabilitation and repair, pavement rehabilitation and resurfacing, as well as sidewalk and curb ramp improvements to address accessibility deficiencies on public rights-of-way along state highways.

ODOT's Asset Preservation Plan serves to support and sustain our highway infrastructure, and is critically important to maintain adequate service levels and performance of the system. Asset preservation activities support the improvement strategies that are identified in the Department's 8 Year Construction Work Plan by extending the life of existing bridges and pavements, until replacement or reconstruction is warranted and can be funded. The 2019-2022 Asset Preservation Plan includes nearly 400 projects statewide for a total value of more than \$472 Million.

Timely asset preservation is critical to accomplish the mission of the Department: to provide a safe economical and effective transportation network for the people, commerce and communities of Oklahoma. Activities that preserve bridges and pavements represent a proactive approach to managing highway infrastructure that is more cost-effective. By extending the life of bridges and pavements, we are safe-guarding those investments, improving safety, and providing a smoother facility. Additionally, performing a series of successive pavement preservation treatments during the life of a pavement is less disruptive to uniform traffic flow than the long closures normally associated with reconstruction projects, resulting in saving time and money for our customers - the driving public.

ODOT is committed to the care and maintenance of the highway system, and to providing the best possible service to its users. This Asset Preservation Plan is a key element in delivering on that commitment.

J. Michael Patterson
Executive Director

**BUDGETARY
PROJECTIONS**

Budgetary Projections

ASSET PRESERVATION PLAN - SFY 2019 through SFY 2022

The budgetary projections utilized for the basis of the fiscally responsible and financially balanced Asset Preservation Plan were established through a systematic evaluation of the Department's anticipated State and Federal revenues and expenditures. Projections were performed for State Fiscal Years 2019 - 2022 with the State Fiscal Year defined as beginning July 1st and ending on June 30th. The budgetary projections only address funding that has been historically and/or categorically committed to State asset preservation.

For the purposes of the initial projections, an estimated budgetary baseline amount of \$120 million was utilized as the benchmark for SFY 2019. This baseline amount provides \$75 million for roadway preservation, \$40 million for bridge preservation and engineering, and \$5 million for accessibility projects statewide.

A formula that includes consideration for conditions and that is influenced by the lane miles in each Field Division is applied to the roadway asset preservation baseline amount to insure an equitable geographic distribution of each Fiscal Year projection. Likewise, a formula that is focused on the square footage of bridge deck in each Field Division is applied to the bridge preservation baseline amount to achieve a similar distribution of the available bridge asset preservation funds. Lastly, a formula considering common demographic, physical and historical criteria, and yields a Divisional percentage that renders an equitable distribution of funds set aside for accessibility projects.

**BALANCING
PROCESS**

Balancing Process

The development of Asset Preservation Plan begins with our Field Division Engineers and is guided by their knowledge of the transportation needs and priorities in their respective Divisions. They and their staff work to maintain an understanding of the condition of the roads and bridges in their areas of responsibility.

Their daily experiences and knowledge of the transportation assets is then coupled with the careful consideration of the improvements anticipated to be delivered through the Eight Year Construction Work Plan (CWP). It is important to maintain a clear perspective of the project development schedule for the improvements encompassed by the CWP. The timing of preservation activities is paramount in order to avoid potential project conflicts and to maintain the transportation system in a serviceable and manageable condition until any planned larger scope improvements can be achieved.

The Asset Preservation Plan is a function of each Field Division's condition assessments of the highway network, the associated critical needs and the work to be accomplished in the CWP along with the anticipated preservation budgets. Annually, the Field Division Engineers review and validate the scheduled Asset Preservation Plan projects and target their needed preservation activities in accordance with the projected funding availability. The Asset Preservation Plan is crafted with foremost consideration for maintaining the integrity of the Field Division Engineer's transportation system management strategy and project priorities. In addition, the balancing process seeks to insure that each Field Division is allocated available funding in accordance with the aggregate budget projections.

ADDITIONAL CONSIDERATIONS

System preservation can be dramatically influenced by the unpredictable effects of weather, deterioration and ever changing traffic patterns. Therefore, asset preservation activities are somewhat more reactionary in nature than the calculated improvements encompassed in the Construction Work Plan. Some re-prioritization of the preservation activities depicted herein is acceptable and expected.

The Asset Management Plan is balanced within these guidelines and has been determined to be an equitable representation to the satisfaction of the Department and the Transportation Commission.

**SUMMARY
REPORT**

ASSET PRESERVATION PLAN SUMMARY REPORT

SFY	Available Funds	Division 1	Division 2	Division 3	Division 4	Division 5	Division 6	Division 7	Division 8	SFY Totals
