Subject Railroad

Here at TDK Ferrite corporation the railroad is vital to our operation. A large portion of our raw material is delivered by rail which is the most cost effective way to ship these raw materials. Without the railroad we would have to use trucks to get our raw materials shipped in, which would increase our cost making it even more difficult to obtain profit. We currently have around 200 employees here at TFC that are currently working very hard to make sure TFC is a profitable company, so any help we can get to resolve the railroad issue will be greatly appreciate.

Sincerely
Ron O'Shell
