

Estimating Risk

- **In planning estimating, does your state have specific methodology and tools to identify, mitigate, retire, manage and document risk?**
- **What portion of your agency program do you utilize specific risk management techniques (only the largest projects, medium sized projects, total program)?**
- **Are there different approaches to risk management depending on size of project?**
- **Does your state participate in FHWA Cost Estimation workshops for major projects?**
- **What are your greatest challenges with risk management (identification, qualification, or management)?**
- **There are also risks involved in specific item estimates, for example new or unique items. How do you deal with risk on these items?**
- **What are some of the items of work where there are major risk areas in a construction project?**
- **What agencies have specific risk management processes? Planning vs Design (pre letting) vs post letting.**

Note; The questions and discussion points are used as a starting point. Please feel free to include other relevant points for your participation.
